The Magazine — how we write

Summary

This is a sample PDF shipped with the Trokky magazine template. It exists so that the **Documents** section has something to show on a fresh install: a file people can download, listed with a title, a date and a summary.

What a document is

A document is a Trokky content type whose main field is a file rather than a body of text. Reports, forms, minutes, price lists — anything readers download rather than read in the browser.

Replace it

Open **Documents** in Studio, delete this one, and upload your own.
